

DIGITAL SIGNAGE EXPLAINED - VIDEO WALL DISPLAYS

Create an impact and captivate your audience with vivid digital art, through **Video Wall Displays.**

Video walls are seamless display configurations comprising of various screen layouts. A mosaic of multiple displays affixed to one another with the slimmest bezel to provide a flawless impression of one large-scale display.

Using high-definition LED or LCD panels, the setup format can vary from portrait to landscape. Personalized, customized digital content can be split to display multiple sources across screens using dynamic digital display software, controlled by one centralized point or CMS (Content Management System), and/or a media player or built-in SOC (System-on-Chip).

No matter the industry, video walls create that wow-factor and give an eye-catching impression to any environment..

Ethniks offers end-to-end video wall solutions across all industries.
